CFE Media Announces the 2018 System Integrator Giants Winners

Downers Grove, Ill. — CFE Media has released its 2018 System Integrator Giants* listing, which ranks the top global companies involved in system integration projects throughout manufacturing. The 100 system integrators distinguished by this award will be recognized in the annual Global System Integrator Report, and online at www.controleng.com and www.plantengineering.com.

If further affirmation was needed that global manufacturing continues to drive overall economic growth, the changes at the top of the 2018 System Integrator Giants list ought to provide the final proof.

There was a change at the top of the 2018 SI Giants list, as Leidos more than doubled its reported system integration income in the past year from \$160 million to more than \$368 million. They took over the top spot from Wood (formerly Wood Group), but Wood still increased system integration revenue more than 20% to \$205 million.

In this year's rankings, 15 of the top 100 companies are outside the United States, including eight from Canada, three from India, and one each from Russia, Turkey, Brazil, and Serbia. Overall, the 2018 SI Giants account for \$2.5 trillion in revenue, and more than half of the companies on this year's list (54%) had revenues above \$10 million last year.

See the firms named for 2018, and prior years, at www.controleng.com/giants.

**In order to align it with all of the other recognitions we have in this issue, we have designated this year's rankings as the 2018 SI Giants. We wanted to inform those companies who use this ranking each year about this change.*

2019 System Integrator Giants program

The 2019 System Integrator Giants program will begin accepting entries June 1, 2018. Ensure that your firm's revenue information in your Global System Integrator Database profile is updated on or after this date.

About CFE Media LLC

CFE Media provides engineers in manufacturing, commercial and industrial buildings and manufacturing control systems with the knowledge they need to improve their operational efficiency. CFE Media delivers the right information at the right time through a variety of platforms. CFE means "Content for Engineers," and CFE Media means comprehensive, relevant content delivered to engineers around the world – on time, on their schedule. CFE is the platform for content, community and applications that engage engineers worldwide to share, learn and increase productivity across all engineering designs, systems, and plants.
